

Revenue Systems Management

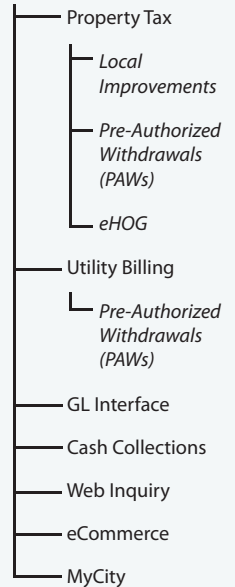

Revenue Management, interdepartmental coordination and sharing of information are some of the most critical challenges facing Local Government today. Compounding this business reality is increasing expectations by constituents for access to information as well as your municipality's own budget concerns. Tempest has been assisting local governments to address these challenges since 1993. The Tempest suite of Revenue Systems Management software enables Local Governments to focus on all aspects of revenue operations by combining a comprehensive set of applications that are seamlessly integrated through a centralized Land Management system. The integrated suite of Tempest products ensures uniformity of data, no data redundancy and more efficient and effective access to information enabling more timely and critical business decision making. In addition, Tempest's web-based applications enable local governments to meet constituents' expectation for flexibility and access in a cost effective manner.

The Tempest Revenue Suite includes:

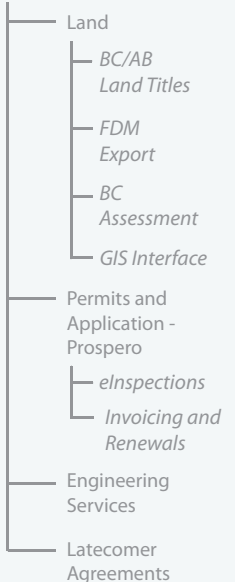

- Property Tax
- Utility Billing
- Pre-Authorized Withdrawals
- Local Improvements
- Dog Licenses
- Business Licenses
- Municipal Ticketing
- Cash Collections
- GL Interface

Community Development

Bylaws & Ticketing

"Bottom line: A great product! We find the software very straight forward, intuitive and easy-to-use. We have upgraded the software using our own IT technicians and Tempest technicians, in both cases the implementation of the upgrades has been very smooth with minimal downtime. The professionalism of the training is always high, as the instructor creates an environment that is both informational and fun. Tempest strives to continually offer great software backed by their technical support and training necessary to make their product an industry leader."
